

DoubleBubble It's so Bubbly

BSC (Binance Smart Chain)

Pinkpaper

Bubble Ecosystem

What is DoubleBubble?

- **The First BSC Token to Offer BTC & ETH Double Dividend Rewards. Earn BITCOIN and ETH automatically by simply holding the Double Bubble token, the first of its kind token on the BSC.**
- **Bitcoin and Ethereum need no introduction. The two BIGGEST cryptocurrencies on the planet will be paid out directly to your wallet.**
- **Double Bubble provides our investors with true passive income simply by holding \$DBUBBLE Tokens 24x7.**

Bubblicious plans

The Bubble Swap Decentralized Exchange is at the core of our plans, the DEX will provide unique and comprehensive support for Divided Token Listings. Thereby allowing for divided Tokenomics integration and support farming, staking and IFOs. In addition, we will be developing dashboard integration as a core feature of the DEX allowing any token which lists from the LaunchPad integration to the Dashboard allowing their investors access to real-time Universal Divided Tracking.

Bubble Lockers and Charts will allow developers and projects to lock both liquidity and tokens via the Bubble LaunchPad. This allows investors the ability to evaluate the safety of a token before investing and allows for monitoring of price-performance from one place through Bubble Charts.
